

# SHARAN NAGANURI

Java Full Stack Engineer | AI Workflow Automation | Building Scalable Solutions  
[naganurisharan@gmail.com](mailto:naganurisharan@gmail.com) | +91 81972 91902 | [LinkedIn](#) | Bengaluru, Karnataka

## PROFESSIONAL SUMMARY

Java Full Stack Developer with 2+ years of experience building **enterprise-grade** applications using **Java, Spring Boot, and Angular**. Skilled in developing secure **RESTful APIs**, implementing authentication with **Spring Security, JWT, and OAuth2**, and building cloud-native applications on **GCP Cloud Run**. Experienced in distributed systems using **Kafka** and **Redis**, with hands-on experience integrating **Generative AI** into enterprise workflow automation.

## PROFESSIONAL EXPERIENCE

### Java Full Stack Developer

March 2024 to Present

Tata Consultancy Services (TCS) - A leading global IT services, consulting, and business solutions organization.

- Engineered and maintained **20+ RESTful APIs** using **Spring Boot, JPA/Hibernate**, enabling secure and scalable operations across multiple business modules.
- Designed **authentication** and **authorization** using **Spring Security, OAuth2, and JWT**, securing **20+ APIs** with role-based access control.
- Built **responsive** and **reusable** UI components using **Angular** and **JavaScript**, reducing code duplication, improving cross-browser compatibility, and increasing user engagement by **15%**.
- Containerized applications using **Docker** and deployed them on **GCP Cloud Run**, enabling auto-scaling and maintaining **99.9%** application availability.
- Integrated **Kafka-based asynchronous** messaging and **Redis** caching, reducing **API** response time by approximately **25%** and improving backend performance for high-frequency requests.
- Owned **end-to-end** development of multiple production features from design through deployment using **Git, Maven, Postman, and Bitbucket**.
- Collaborated with cross-functional **Agile** teams to deliver multiple production features through **sprint planning, backlog refinement, and code reviews**.

## SKILLS

**Programming languages:** Java, SQL, JavaScript, TypeScript.

**Backend Development:** Spring Boot, REST APIs, Spring Security, JPA, Hibernate, JWT, Kafka, Redis.

**Frontend Development:** Angular, HTML, CSS, Angular Material, Bootstrap.

**Databases:** Oracle, MySQL.

**Cloud & Tools:** Docker, Google Cloud Platform (GCP), Cloud Run, Git, Maven, Postman, Bitbucket.

**AI & Automation:** Generative AI, Prompt Engineering, OpenAI/Gemini API Integration, AI Workflow Automation, Agentic AI, Model Context Protocol (MCP), LLM Integration.

**Architecture & Practices:** Microservices, MVC, Agile, Scrum.

## PROJECTS

### 1. VendorHub (Client Project)

**Tech Stack:** Java, Spring Boot, Angular, Oracle, Kafka, Redis, JWT, GCP.

- Designed a vendor onboarding workflow with role-based approvals and background verification tracking.
- Developed advanced search, filtering, and Excel export capabilities for operational reporting.
- Leveraged GenAI to summarize audit logs and automate Jira tasks, reducing manual effort in operational analysis.

### 2. Queryline

**Tech Stack:** Java, Spring Boot, Angular, MySQL, Gemini 1.5 Flash API, Apache POI.

- Built a Text-to-SQL engine using Gemini 1.5 Flash API to convert natural language into executable SQL queries.
- Dynamically extracted database schema using INFORMATION\_SCHEMA to improve multi-table SQL generation.
- Implemented SQL validation, Excel report generation, and AI-generated report summaries for business users.

## EDUCATION

KLE DR MS Sheshgiri College of Engineering and Technology, Belagavi

2019 - 2023 / 7.58 CGPA

Bachelor of Engineering in Electronics and Communication Engineering.

## CERTIFICATIONS

- Java Programming by Engineer's Academy.
- Java Backend Development-Live by GeeksForGeeks.
